PRODUCT TRAINING ROADSHOW

Italy Roadshow

Sunways recently collaborated with its esteemed partner Unical for a dynamic week-long roadshow across Italy. From November 6 to 11, 2023, the two companies joined forces to provide an immersive experience for participants, offering a deep dive into the latest advancements in solar technology.

The roadshow unfolded across multiple Italian cities, creating a platform for industry professionals to explore, learn, and engage with the latest advancements in solar technology. Here is a snapshot of this journey:

November 6 - Caorso

November 7 - Gambellara

November 8 - Riccione

November 9 - Prato

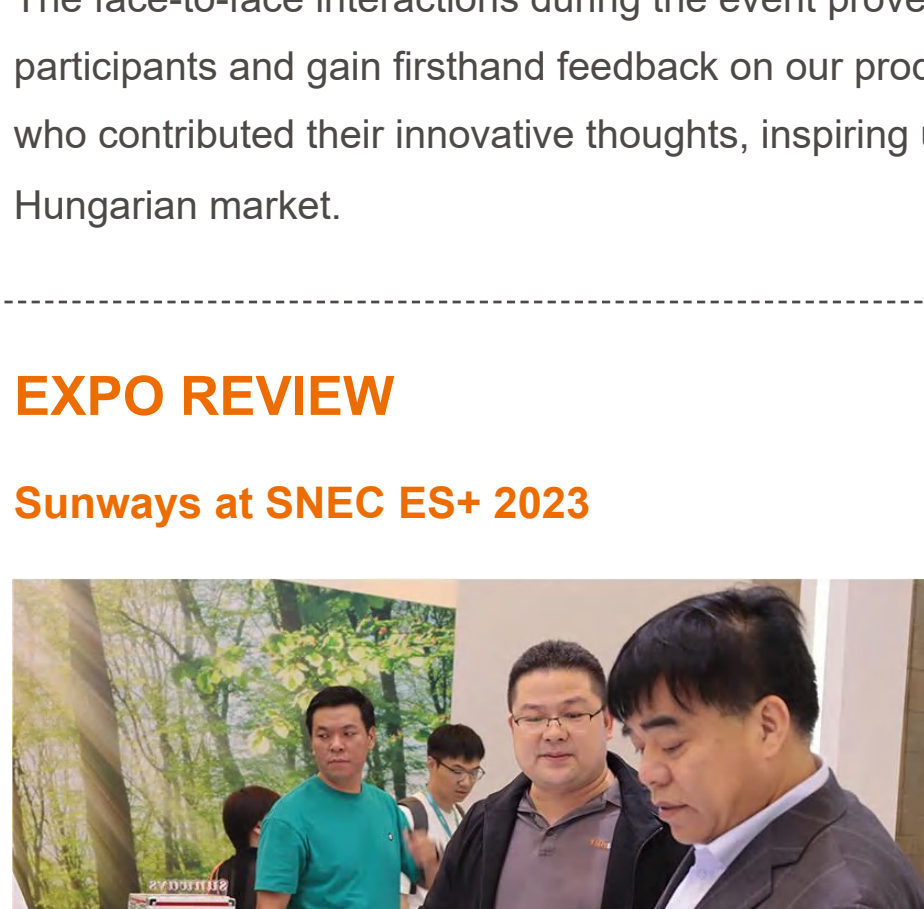

November 10 - Anagni Fiuggi

November 11 - Bari

Throughout the roadshow, participants were immersed in comprehensive product training sessions, unlocking exclusive insights instrumental in navigating the dynamic landscape of renewable energy. Sunways hybrid inverters and grid-tie systems were showcased as integral components of the sustainable energy ecosystem.

Hungary Roadshow

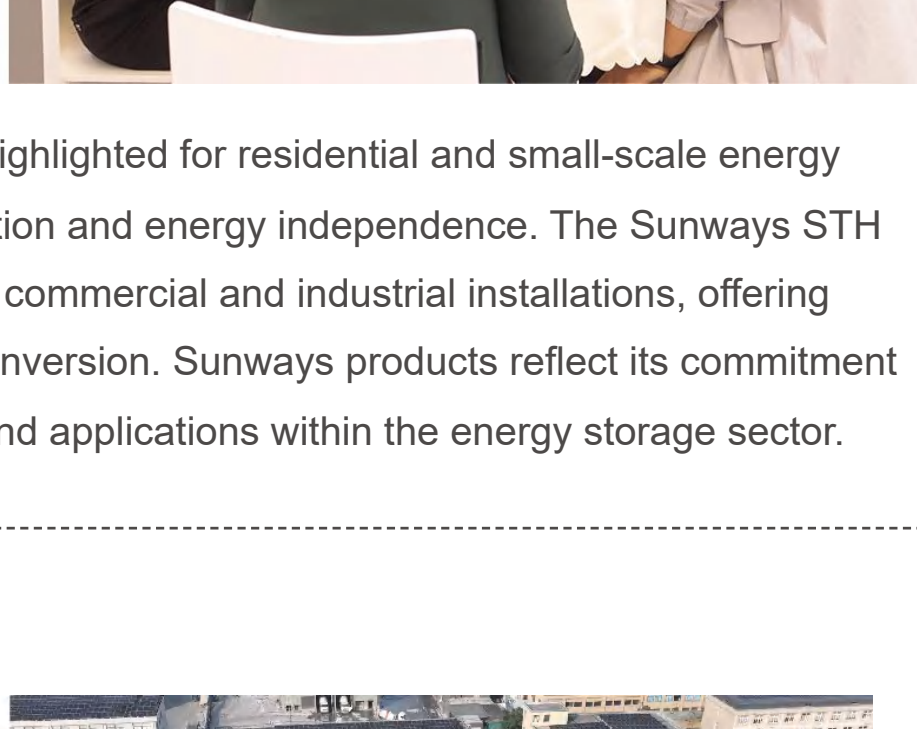

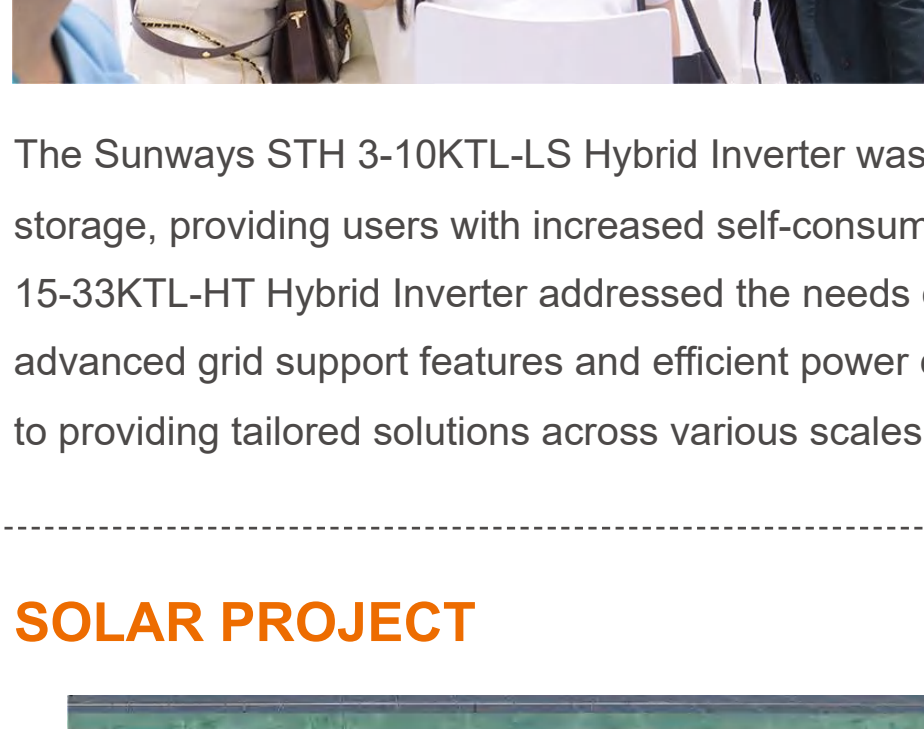

Sunways was honored to participate in a wonderful event hosted by A1 Solar Kft on November 14, 2023, in Budapest. This event provided a unique opportunity for Sunways to showcase its innovative energy storage solutions, specifically focusing on the STH 4-12kW hybrid inverter series and the STE-BS high-voltage Li-ion battery.

The face-to-face interactions during the event proved to be invaluable, allowing us to connect directly with participants and gain firsthand feedback on our products. We extend our sincere appreciation to everyone who contributed their innovative thoughts, inspiring us to further enhance our services tailored for the Hungarian market.

EXPO REVIEW

Sunways at SNEC ES+ 2023

Sunways showcased its innovative energy solutions at SNEC ES+ 2023 exhibition in Shanghai. The company presented comprehensive range of hybrid inverters and a new micro inverter series, emphasizing its commitment to driving innovation in energy storage.

The Sunways STH 3-10KTL-LS Hybrid Inverter was highlighted for residential and small-scale energy storage, providing users with increased self-consumption and energy independence. The Sunways STH 15-33KTL-HT Hybrid Inverter addressed the needs of commercial and industrial installations, offering advanced grid support features and efficient power conversion. Sunways products reflect its commitment to providing tailored solutions across various scales and applications within the energy storage sector.

SOLAR PROJECT

Location: China

Capacity: 1.2MW

Inverter: **STT-80KTL, STT-110KTL**

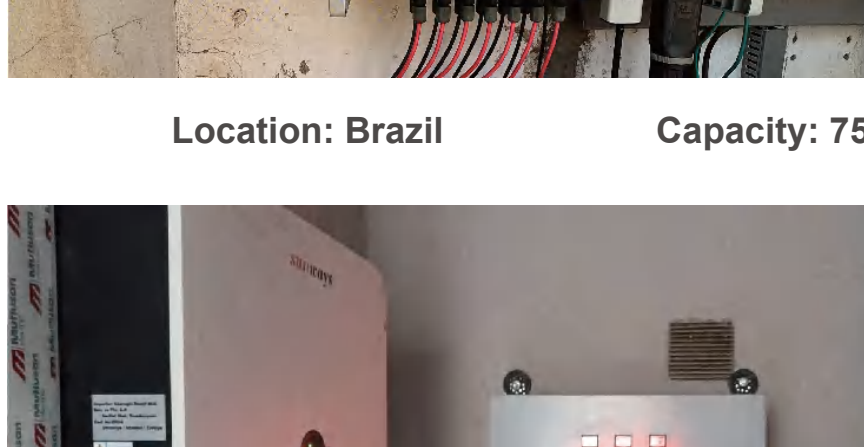

Location: Turkey

Capacity: 400kW

Inverter: **STT-100KTL**

Location: Sweden

Capacity: 88kW

Inverter: **STT-80KTL**

Location: Brazil

Capacity: 75kW

Inverter: **STT-60KTL-M, STT-15KTL-P**

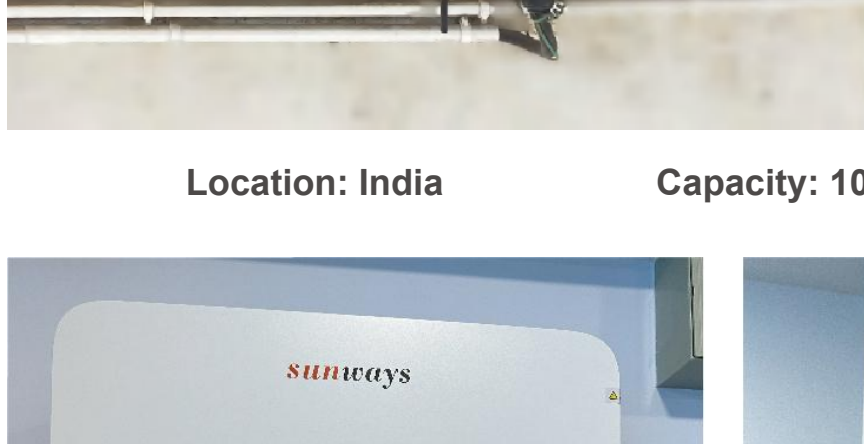

Location: Turkey

Capacity: 10kW

Inverter: **STT-10KTL-P**

Location: India

Capacity: 10kW

Inverter: **STT-10KTL**

Location: Thailand

Capacity: 10kW

Inverter: **STT-10KTL**

Location: Jordan

Capacity: 5.5kW

Inverter: **STS-3.6KTL-P**

Location: India

Capacity: 5kW

Inverter: **STS-5KTL**

Sunways, in collaboration with exclusive distributor Photonergy, is hosting a deep dive into the future of solar energy on December 1, 2023 in Antipolo. The event will feature key insights into Sunways product roadmap, on-grid inverters, and advanced technologies. Attendees can engage in interactive sessions and gain valuable knowledge from industry experts.
